Introduction to Poster Project

March 17, 2015

Professional Poster Presentations

- Professional scientific posters are one way that scientists display their research to other scientists at conventions
- For our benchmark review you will work in pairs to create a poster highlighting one area from this past quarter
- You will then present and view your classmates posters

Critique Mrs. Feldmann

- On your whiteboards, keep notes during my presentation on what I do well and where I need to improve

Did Well	Needs Improvement

- I'll take your suggestions and try again
- Critique both my poster and my presentation using the rubric found in your baskets

Partners and Topics

- Pick your partner (does not have to be present today)
- You may choose to work alone
- Random drawing of topics
