

Climate Change Quiz

For each of the following statements circle whether you think it is true or false. After reading articles on climate change you will review these statements again and see if your answers have changed.

Pre-quiz	Post-quiz	Pre-quiz	Post-quiz
1. Warmer temperatures will lead to increased food supplies due to longer growing seasons.	T F T F	1. Warmer temperatures will lead to increased food supplies due to longer growing seasons. FALSE	T F T F
2. Warmer temperatures are NOT responsible for the recent increased severity of hurricanes.	T F T F	2. Warmer temperatures are NOT responsible for the recent increased severity of hurricanes. FALSE	T F T F
3. Warmer temperatures are causing Arctic sea ice to melt, which is increasing sea levels.	T F T F	3. Warmer temperatures are causing Arctic sea ice to melt, which is increasing sea levels. FALSE, sea ice does not contribute to rising sea levels	T F T F
4. Climate change is expected to be responsible for the extinction of 30% of current animal species.	T F T F	4. Climate change is expected to be responsible for the extinction of 30% of current animal species. TRUE	T F T F
5. Forests will not be affected by climate change because trees are very hardy species.	T F T F	5. Forests will not be affected by climate change because trees are very hardy species. FALSE	T F T F
6. People in the United States may be at risk for malaria if temperatures continue to rise.	T F T F	6. People in the United States may be at risk for malaria if temperatures continue to rise. TRUE	T F T F
7. Allergies and asthma will get better because of the decrease in humidity associated with climate change.	T F T F	7. Allergies and asthma will get better because of the decrease in humidity associated with climate change. FALSE	T F T F
8. Wild fires will be more intense and more frequent in the future.	T F T F	8. Wild fires will be more intense and more frequent in the future. TRUE	T F T F
9. Climate change will only cause a small increase in temperatures.	T F T F	9. Climate change will only cause a small increase in temperatures. TRUE (but the changes will be significant)	T F T F
10. Climate change is something that will affect future generations, it is NOT happening now.	T F T F	10. Climate change is something that will affect future generations, it is NOT happening now. FALSE	T F T F

Climate Change Quiz Key

For each of the following statements circle whether you think it is true or false. After reading articles on climate change you will review these statements again and see if your answers have changed.
